

# Carbon Reduction Plan

Supplier name: Triple 3 Healthcare Group Limited .....

Publication date: 14/10/2024.....

## Commitment to achieving Net Zero

Triple 3 Healthcare Group Limited is committed to achieving Net Zero emissions by 2050.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and serve as a reference point against which emissions reduction can be measured.

Baseline Year: 2023	
Additional Details relating to the Baseline Emissions calculations.	
Triple 3 operates from a serviced office at Queens Court in Romford. The baseline emissions for 2023 are based on estimated electricity consumption, the director's commute, business travel, and paper usage, as this is the first carbon footprint assessment. The company has not previously reported emissions.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	1.2
Scope 2	3.5
Scope 3 (Included Sources)	0.14
Total Emissions	4.84

## Carbon Reduction Plan

### Current Emissions Reporting

Reporting Year: 2023	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	1.2
Scope 2	3.5
Scope 3 (Included Sources)	0.14
Total Emissions	4.84

### Emissions reduction targets

To continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets:

We project that carbon emissions will decrease over the next five years to 3.63 tCO<sub>2</sub>e by 2028. This is a reduction of 25% from the baseline year of 2023.

Progress against these targets can be seen in the graph below:

Projected Carbon Emissions Reduction (2023-2028)

Carbon Reduction Plan

Description of the Graph:

The graph is a line chart illustrating the projected reduction in total emissions from 2023 to 2028. The Y-axis represents the Total Emissions in tonnes of CO<sub>2</sub>e, ranging from 0 to 5. The X-axis represents the years from 2023 to 2028. The line starts at 4.84 tCO<sub>2</sub>e in 2023 and steadily declines to 3.63 tCO<sub>2</sub>e by 2028. This visual representation highlights a planned 25% reduction over five years.

Year	Total Emissions (tCO <sub>2</sub> e)
2023	4.84
2024	4.43
2025	4.02
2026	3.81
2027	3.63
2028	3.63

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2023 baseline. The carbon emission reduction achieved by these schemes equates to approximately 1.21 tCO<sub>2</sub>e, a 25% reduction against the 2023 baseline. These measures will be in effect when performing the contract:

- Energy Efficiency:
  - Upgraded to energy-efficient LED lighting in the office.
  - Implemented policies to ensure all office equipment is turned off when not in use.
- Paperless Office:
  - Adopted digital documentation processes to significantly reduce paper consumption.
- Sustainable Travel:
  - Encouraged staff to use public transport and car-sharing options.
  - Promoted virtual meetings to minimize business travel.
- Director's Commute:
  - Exploring options for the director to switch to an electric or hybrid vehicle to reduce Scope 1 emissions.

In the future we hope to implement further measures such as:

- Renewable Energy Sources:
  - Investigating the possibility of sourcing electricity from renewable energy providers for the office.
- Advanced Digital Workflows:
  - Further reducing paper use by adopting more comprehensive digital solutions.
- Enhanced Sustainable Travel Policies:
  - Implementing incentives for low-emission commuting options.
  - Considering flexible working arrangements to reduce commuting frequency.

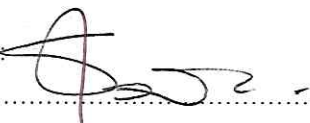

### Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standards for Carbon Reduction Plans. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and use the appropriate government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions has been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
